

South Tyrol weather bulletin

Sunday, 24.05.2026

Forecast for today, Sunday 24.05.2026
 Sunny, hot in the afternoon

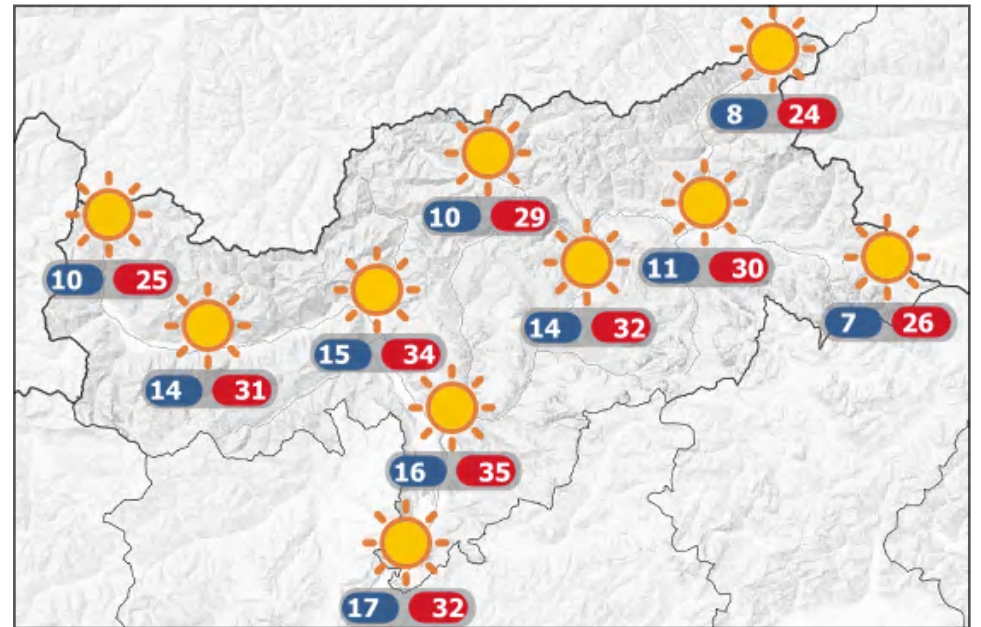

Reliability: 90 %

Forecast for today

The strong high-pressure system continues to dominate the weather. The sun will shine the whole day with hardly a cloud in the sky. Temperatures will reach highs of between 28°C in the Wipptal and 34°C in the Etschtal this afternoon.

Forecast for tomorrow, Monday 25.05.2026
 Lots of sunshine, hot

Reliability: 90 %

Forecast for tomorrow

A strong high-pressure system centred over the British Isles is determining the weather in Central Europe. The sun is shining across the region, with just a few low cumulus clouds forming in the afternoon. Temperatures will rise to between 29° and 34°.

Outlook for the next days

Tuesday 26.05.2026

9° / 17° | 27° / 34°

Tuesday will bring little change. It will remain very sunny, with a few cumulus clouds developing during the second half of the day.

Wednesday 27.05.2026

9° / 18° | 26° / 33°

The weather is expected to become a little more unsettled on Wednesday. Larger cumulus clouds will form during the day and the likelihood of thunderstorms will increase temporarily.

Thursday 28.05.2026

8° / 18° | 25° / 32°

Thursday will be sunny with a few cumulus clouds in the afternoon, but at most isolated thundery rain showers will develop. Temperatures will drop slightly.

Friday 29.05.2026

8° / 16° | 25° / 32°

Friday will also see widespread sunshine.
