

South Tyrol weather bulletin Thursday, 08.10.2026

Forecast for today, Thursday 08.10.2026

Overcast and unstable

Reliability: 80 %

Forecast for today

A south-westerly flow will bring in moist air masses; a cold front will cross our region the evening/night. It will be cloudy, with widespread showers around midday and in the early afternoon. There will then be some dry spells before the showers will become more frequent again during the evening as the cold front will pass through. At the same time, northerly winds will strengthen. Temperatures will not exceed 15° to 20°.

Outlook for the next days

Saturday 10.10.2026

4° / 10° | 13° / 21°

On Saturday, it will be partly cloudy with some sunshine. Isolated rain showers are possible in the afternoon. In the north, the Föhn wind will continue.

Sunday 11.10.2026

3° / 9° | 14° / 21°

Sunday will be mainly sunny, with the wind dying down.

Monday 12.10.2026

3° / 9° | 14° / 21°

On Monday, once the morning fog has cleared, sunny autumn weather will set in.

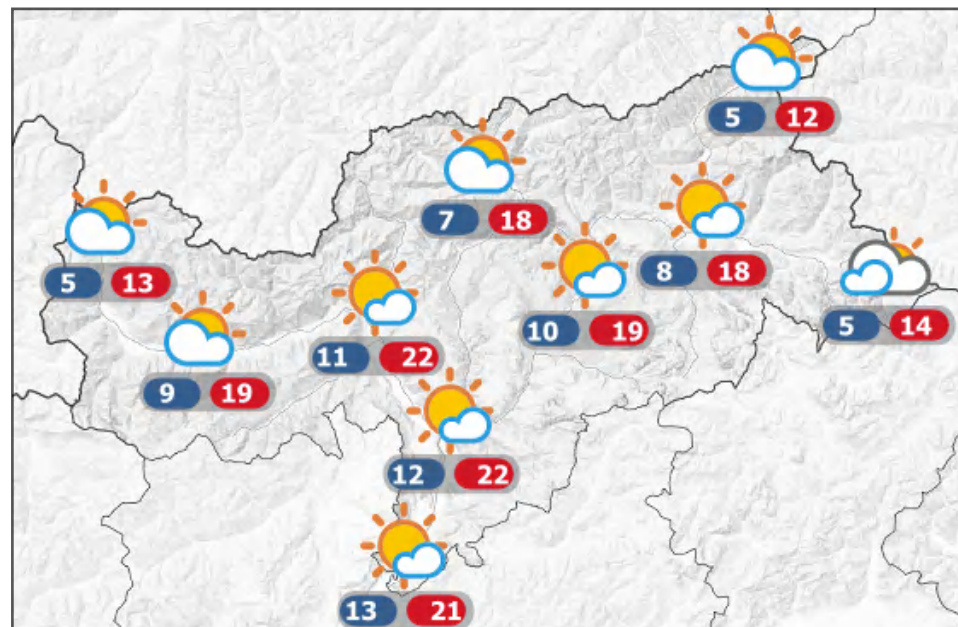

Tuesday 13.10.2026

1° / 7° | 14° / 21°

Tuesday will bring widespread sunshine, with only a few thin cirrus clouds appearing.

Forecast for tomorrow, Friday 09.10.2026

Mostly sunny

Reliability: 70 %

Forecast for tomorrow

Drier air masses ensure stable conditions. Any remaining morning clouds and patches of mist will clear, giving way to fairly sunny conditions. A foehn wind will be blowing in the northern parts of the region. Temperatures will rise to 16° in the Wipptal and up to 22° in the Unterland.
