

Mountain weather bulletin - Overview

Thursday, 08.10.2026

Forecast for today, 08.10.2026

Unstable and wet

Reliability: 80 %

General weather situation

A south-westerly flow will bring in moist air masses; a cold front will cross our region the evening/night.

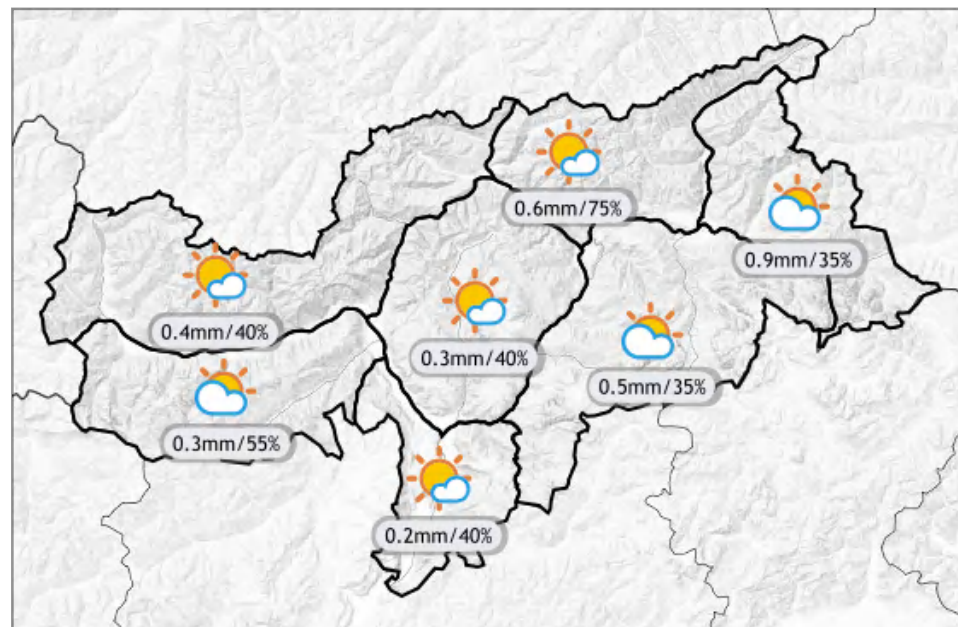

Forecast for today

Visibility will be severely restricted by clouds and fog, and rain showers are expected throughout the day. They are most frequent in the early afternoon and then again in the evening. The snow line will be between 2700 and 2900 m during the day. As the cold front moves in, it will drop to around 2000 m in the north.
