

Mountain weather bulletin Sarntal Alps - 08.10.2026

Forecast for today, 08.10.2026

Unstable and wet

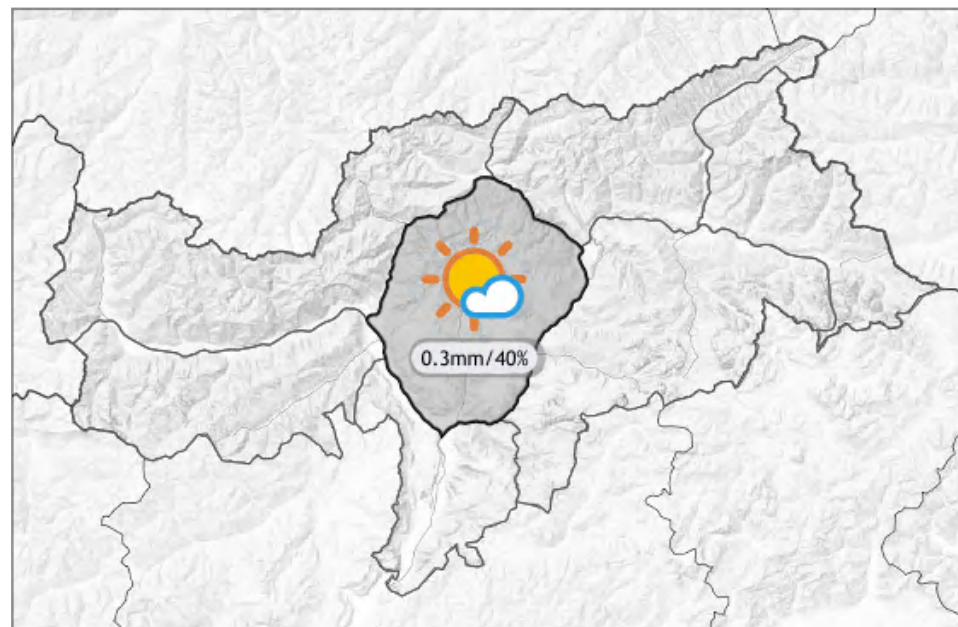

Reliability: 80 %

Precipitation: 9.5 mm Precipitation probability: 95 %
Zero degree level: 3100 m Snow level: 2700 m

A south-westerly flow will bring in moist air masses; a cold front will cross our region the evening/night. Visibility will be severely restricted by clouds and fog, and rain showers are expected throughout the day. They are most frequent in the early afternoon and then again in the evening. The snow line will be between 2700 and 2900 m during the day. As the cold front moves in, it will drop to around 2000 m in the north.

Forecast for tomorrow, 09.10.2026

Quite sunny

Reliability: 70 %

Precipitation: 0.3 mm Precipitation probability: 40 %
Zero degree level: 2900 m Snow level: 2600 m

Drier air masses ensure stable conditions. Patches of fog or valley clouds are restricting visibility in some areas, but otherwise it is mainly sunny.
